The Danish National Travel Survey Annual Statistical Report

Copenhagen Area

2021

Annual Statistical Report

Copenhagen Area 2021

The survey

The Danish National Travel Survey (in Danish: Transportvaneundersøgelsen, TU) is a continuous survey of travel patterns for Danish Residents over 6 years of age. The basic survey design consists of one-person, one-day interviews, conducted at random days during the year. Please refer to www.tudata.dk for more information on the survey.

Using this report

This report may be distributed and cited freely, with proper reference to the report, the Danish National Travel Survey and DTU. The survey may be referenced by DOI: 10.11581/dtu:00000034

Contents of the report

The aim and content of this report is a statistical picture of the transport patterns 2021 for residents over 6 years of age in the Copenhagen Area, defined as NUTS DK011 and DK012, which is approximately the same as the built area.

The tables and figures of this report are, unless otherwise stated, based on persons born 2015 or earlier, resident within the borders of the Copenhagen Area.

Table 1: Data foundation

Residents in the Copenhagen Area	Women	Men	2021 total
Number of interviews	1 591	1 517	3 108
Number of trips	4 926	4 602	9 528

Data version: TU0621v1

Due to rounded figures, columns and rows may only approximately account to the stated sum.

The - is used in tables, when a combination has not been observed in the survey. 0.0 indicates, that the combination has been observed, but evaluates as 0.0.

Table of Contents

This report contains the following tables and figures:

Main results

Modes of transport Table 3: Mileage and travel time by mode Table 4: Modal split, journeys by mode chain type Table 5: Time series, modal split, journeys by chain type group Figure 6: Time series, modal split, journeys by chain type group Figure 7: Time series, collective share of journeys Table 8: Time series, modal split by mileage Figure 9: Time series, modal split by mileage Figure 9: Time series, collective bus market share by mileage Figure 10: Time series, collective bus market share by mileage Table 11: Journeys by length and chain type Table 12: Total road mileage and travel time, sum per day Table 13: Average working day vs. average day traffic Purpose Table 15: Trips, distance and total travel time by purpose Table 16: Journeys, distance and travel time by primary purpose Table 16: Journeys, distance and travel time by primary purpose Table 18: Trips by purpose group and mode chain type Table 19: Travel time by purpose group Table 20: Mileage (PKM) by mode and purpose group Table 22: Vehicle mileage by mode and purpose group Table 23: Journeys by purpose group and mode chain type Commuting Table 24: Commuter journeys by chaintype page 20

Definitions

Annual Average Day

Traffic

Any traffic statistic calculated as average of all 365 days in the year. This definition is understood, when 'per day' is stated. [Danish: Arsdøgntrafik,

abbrev. AADT or ADT]

Business Trip Business Trips are any trips, with **trip purpose** as a professional activity,

conducted at a destination elsewhere than the ordinary workplace. Notice

the difference to Commercial Transport. [Danish: erhvervstur]

Chain Type Mode Chain Type is a qualitative aggregation of the modes on a trip or

journey, such that all cases with collective transport are classified as

such. [Danish: kædetype]

Collective Transport Collective Transport is any mode of transport, where independent

travellers are transported by the same physical vehicle, if only route and time is identical. This definition is almost, but not quite the same as public transport. Public transport generally includes e.g. taxis, which are not

collective.

Commercial Transport Commercial Transport is defined as any transport activity, where the

actual movement is the commercial purpose. This is different from the **business trips**, where the commercial activity is done at each

destination. Classic examples on *Commercial Transport* are bus drivers and **train** drivers. However, the category also includes driving schools, police patrols and certain other jobs. [Danish: erhvervstransport]

Journey A *Journey* is defined as the entire chain from home, return home. Each

Journey consists of at least 2 trips: outbound and homebound. [Danish:

rejse]

Means (of transport) The individual, physical vehicle of transport: "My red bicycle".

Mode (of transport) Generic classification of transport modes: buses, trains etc.

Primary Destination The *Primary Destination* of a **journey** is defined by the stay with the

longest dwell time. [Danish: primært ophold]

Primary Mode The Primary Mode of a trip or journey is the mode of transport with the

greatest, aggregated, travel distance. [Danish: primært transportmiddel]

Primary Purpose The Primary Purpose of a journey is defined as the purpose at the

primary destination, ie. the stay with the greatest dwell time. [Danish:

primært formål]

Train The category *Train* includes all railborne **modes** of transport, including

Metro and Light Rail/Trams. [Danish: tog]

Trip A *Trip* is defined as the movement from one destination to the next. A

Trip uses one or more **means** of transport. [Danish: tur]

Trip Purpose The *Trip Purpose* is defined as the purpose at the end of the **trip**,

directing towards the primary destination of the journey. [Danish:

turformål]

Figure 6: Time series, modal split, journeys by chain type group

Modal Split is reported at the journey level, because the choice of bicycle or car generally applies to the entire journey from home, until return home. Collective Transport is reported as such, including any intermediate walking trips on the journey.

Figure 7: Time series, collective share of journeys

Graphical illustration of collective (public) transport share of journeys, from table 5 above.

The purpose distribution is shown by 2 alternative definitions. By trip purpose above reflects the individual trips and destinations, whereas the journey primary purpose (overleaf) reflects the longest stay on the journey. Travel time for commercial transport has been omitted for technical reasons. This omission induces a small difference in total travel time.

Table 16: Journeys, distance and travel time by primary purpose

Extract defined as journeys with primary target workplace or educational place. This includes journeys with business trip or school excursions, if the permanent commuter destination is the primary target on the journey. Notice, that the primary target is defined as the destination with the longest dwell time.

Table 25: Time series, modal split, workplace commuting
